Medical History

Running a marathon can put a great strain on your body, and undertaking such an activity should not be taken lightly. If you have never done anything like this before and are not a professional runner you should seek professional advice regarding your fitness and training program. If you are over 60 or have any medical conditions that may be affected by running a marathon, you must obtain a medical certificate before you can run. Please confirm to the best of your knowledge that your state of health and fitness is good and that you take full responsibility for yourself.
